

ΘΕΜΑ 1. ΚΑΤΑΝΟΗΣΗ ΓΡΑΠΤΟΥ ΛΟΓΟΥ

Read the text and decide if each statement (1-10) is True (A), False (B) or Not Mentioned (C).

It was morning, and the new sun sparkled gold across the tiny waves on the surface of a gentle sea. A mile from shore a fishing boat disturbed the water and the word for Breakfast Flock flashed through the air, till a crowd of a thousand seagulls came to make the right move and fight for bits of food. Another busy day was beginning.

But way off alone, out by himself beyond boat and shore, Jonathan Livingston Seagull was practising. A hundred feet in the sky he lowered his joined feet, lifted his mouth and nose, and strained to hold a painful twisting curve through his wings. The curve meant that he would fly slowly, and now he slowed until the wind was a whisper in his face, until the ocean stood still beneath him. He narrowed his eyes in fierce concentration, held his breath, forced one... single... more... inch... of... curve... Then his feathers shook, he stopped and fell. Seagulls, as you know, never stop. To stop in the air is for them disgrace and dishonour. But Jonathan Livingston Seagull, unashamed, stretching his wings again in that trembling hard curve -slowing, slowing, and stopping once more- was no ordinary bird.

Most seagulls do not bother to learn more than the simplest facts of flight -how to get from shore to food and back again. For most seagulls, it is not flying that matters, but eating. For this seagull, though, it was not eating that mattered, but flight. More than anything else, Jonathan Livingston Seagull loved to fly. This kind of thinking, he found, is not the way to make one's self popular with other birds. Even his parents were disappointed as Jonathan spent whole days alone, making hundreds of low flights near the surface of the sea, experimenting.
